

TB-0352

VALID DASIDs REQUIRED FOR ALL RACF USER IDs

Issue Date: November 10, 2004
Effective Date: December 1, 2004
Section/Group: ITS Security
Submitted by: Bart Grant
Approved by: Michael Allred

RACF user IDs with missing or invalid DASIDs are resulting in an excessive amount of default billing. To correct these billing problems, as of December 1, 2004, ITS will resume the enforcement of valid DASIDs for RACF user IDs.

The TSO ACCTNUM field for each RACF user ID will be checked daily. User IDs with missing or invalid DASIDs will be "HARD REVOKED" and will not be available for on-line or batch work until corrected.

Agency security administrators have already received lists of RACF user IDs with invalid or missing DASIDs for their agency, with a request to provide correct information. These communications will continue until this process is implemented.

Any questions concerning this process may be referred to ITS Security.
